DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 84-110, drawn to a method for producing a catalyst support, classified in class 423, subclass 447.1.
- II. Claims 111-115, drawn to a composition comprising catalyst on a support, classified in class 502, subclass 527.14.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the composition can be made by another and materially different process, wherein the catalyst used to grow the nanotube remains in contact with the nanotube structure, such as exposed at the tip.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Ross Garsson on 3/18/04 a provisional election was made without traverse to prosecute the invention of Group I, claims 84-110. Claims 111-115 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ross Garsson on 5/24/04.

The application has been amended as follows:

Cancel claims 111-115.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Although the prior art of reference, specifically US 5,569,635, US 6,159,892, and US 6,099,965, teach the process of producing catalyst supports by contacting catalysts or catalyst precursors with carbon fibril and/or multi-walled carbon nanotube aggregates, the prior art neither teaches nor suggests the process of producing a catalyst support using single-walled carbon nanotubes.

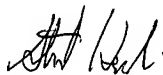

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
